

Jacob Prue

Full-Stack & Cloud Engineer

jacob.prue.info · github.com/jp64057

SUMMARY

Full-stack engineer building scalable, cloud-native systems with React, Node.js, and AWS. Focused on infrastructure as code, type safety, and shipping reliable software end to end.

SKILLS

Frontend	React, Next.js, TypeScript, Tailwind CSS
Backend	Node.js, serverless functions (AWS Lambda), REST API design
Cloud / AWS	Lambda, API Gateway, S3, CloudFront, Route 53, SES, IAM
DevOps / CI-CD	GitHub Actions (OIDC), Terraform (Infrastructure as Code)
Databases	DynamoDB
Languages	TypeScript, JavaScript

PROJECTS

Personal Portfolio jacob.prue.info

Full-stack portfolio: a Next.js static site on S3 + CloudFront, with a serverless API (Lambda + API Gateway + DynamoDB) powering the contact form, live GitHub stats, per-page visitor counts, and resume-download tracking. All infrastructure defined in Terraform; CI/CD via GitHub Actions with OIDC (no long-lived cloud credentials).

EXPERIENCE

Software Engineer · Company Name 20XX - Present

- Placeholder: describe a system or feature you shipped and its impact.
- Placeholder: quantify a result (performance, reliability, or scale).
- Placeholder: note ownership, collaboration, or tooling you introduced.

Software Engineer · Previous Company 20XX - 20XX

- Placeholder: a key responsibility or accomplishment.
- Placeholder: a technology or practice you championed.

EDUCATION

B.S. in Computer Science · University Name 20XX
